Registration Page

      The registration form is where the user will need to input their information for them to have an account. Once they have finished and filled all details, they may be able to sign-up. A message box will prompt the user, telling them that their account has been registered successfully and they can now proceed to Login their account. The registration page also validates the user input and won't proceed to successful registration if the user left at least one empty field. The user may also upload their selected artwork or their chosen photo.

Login Page

This login form is where the user can now access their created account by inputting the correct and corresponding information/credentials in based from what account they registered. In case they don't have an account yet, the system also features a link labeled "Register Here," which will send them to the Registration Page for their account creation. The user may be able to login using their username or email (any of the two) that matches to their password they signed-up. It has also a show and hide password button for account security.

Main Page

      This is the "Main Form". It offers features such as; "Draw, Upload Artwork, My Artworks, Feed, Save & Edit, and Logout". This is where artworks from different creators (as samples) are shown and can be viewed by clicking each artwork. The feed also shows the newly added artwork from uploading it or by saving an art sketch/drawing. The user profile and their information are also visible and incorporated in this page. The user may be able to save and edit about a short biographical profile of themselves in the "About Me" section.

Draw Page

The draw feature is where users may freely draw anything they wish to draw. This aims to let all users of the system to showcase their creativity skills. In addition, they can decide if they want to save their artwork or go back to the main page by clicking the back button. The user can also insert customizable shapes into the plain canvas (white background). They may also explore and utilize all tools and change different colors from the color picker.
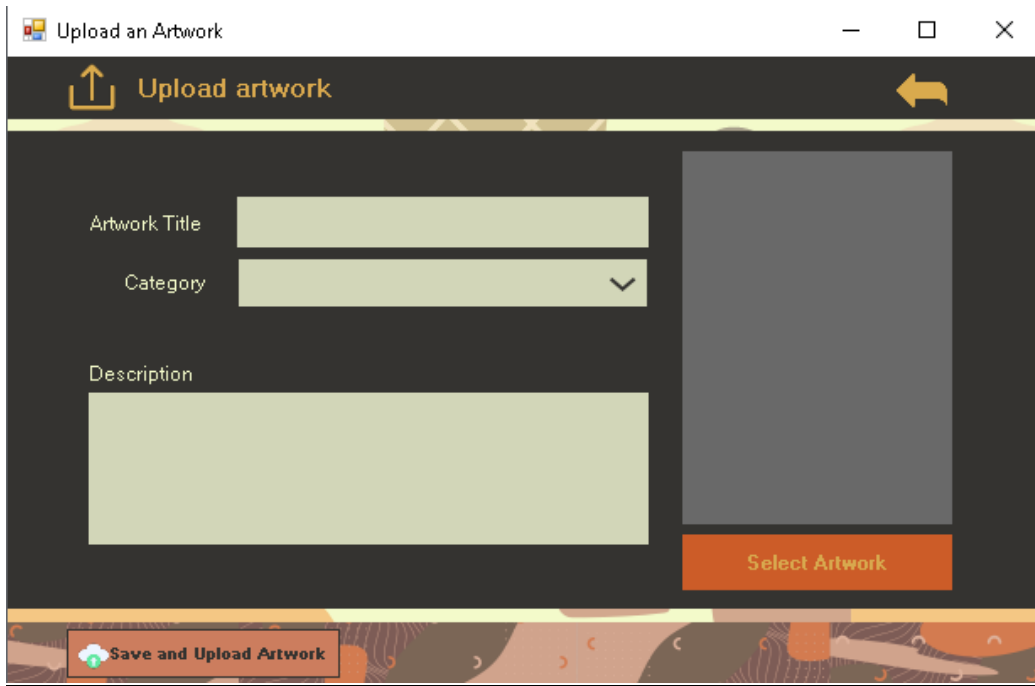

Upload Artwork Page

   This is the form for uploading artworks. In this page, the user can upload their artwork by choosing the file in their computer. They can save and upload their artwork by entering an Artwork Title, Category, and Description of the art. All uploaded artworks will be saved in their very own My Artworks gallery. The back button on the other hand, will bring back the user to the system's home page.

View Artwork Page

This is the "View Artworks Form". By simply clicking on their artwork itself they will be directed to this page and users can post a comment about the artwork. If a user is interested in the artwork there is a "Contact Artist" feature which they can submit a form to the system to contact its artist.

My Artworks
  All drawings from the Draw feature and uploaded photos/artworks/paintings are saved here. This displays all the artworks that are saved. Users may be able to scroll their artworks by using the customized and designed scrollbar that adds artistic beauty to the feature.

Contact Artist Page

      This is a form for contacting the artist of the artwork selected for an interested user/client/buyer. Interested users may submit this form with their information and contact in order to notify the artist about their artwork. The contact form also displays the information about the artwork. This is still a developing feature as of now.
